Approaches to Learning (ATL)

The approaches to learning really mean all the aspects of studying and learning that help you develop into a good student: an inquisitive, open minded, efficient and reflective independent learner and communicator. There are 7 different but interconnected approaches to learning:

1. **Work Well**
2. **Collaborate**
3. **Communicate**
4. **Connect ideas**
5. **Think**
6. **Reflect**
7. **Use Information**

Each of these approaches can be broken down into a number of different skills that you should develop as you progress through the Middle Years Programme.
